RIWAYAT PERUBAHAN DOKUMEN

No. Revisi	Keterangan Revisi	Tanggal Revisi	Yang Merevisi
01	Penambahan pada point 5.2.2. mengenai Atau QC inline dan supervisor sewing sama – sama membuat standar kualitas (mock up) untuk proses – proses tertentu (Kritikal proses)	27 Agustus 2023	Elvi Eryanda Manager QA

1. TUJUAN
Purpose

Sebagai panduan dalam melakukan kegiatan jahit-menjahit agar mempermudah pengawasan di semua tahapan proses untuk menjamin kualitas produk sesuai persyaratan yang telah di tentukan.

As a guide in conducting sewing activities to facilitate supervision at all stages of the process to ensure the quality of products according to the requirements that have been specified

2. RUANG LINGKUP
Scope

Semua prosedur dan kegiatan yang dilakukan di area bagian sewing.

All procedures and activities undertaken in the area of sewing.

3. DEFINISI
Definitions

- Order Details adalah informasi berisi jumlah kwantiti untuk setiap warna, ukuran dan jumlah serta tujuannya beserta informasi lain yg dibutuhkan untuk produksi.
  Order Details is information containing the quantity quantity for each color, size and quantity and purpose along with other information required for production.
- Trims card/Accrs card adalah kumpulan trims yang ada di gudang dan sudah mendapatkan persetujuan dari merchandiser pemilik order untuk disitribusikan kepada pihak yang berkepentingan sebagai panduan produksi.
  Trims card / Accrs card is a collection of trims in the warehouse and has obtained approval from merchandiser owner of the order FOR DISTRIBUTING to interested parties as a production guide.
- Approved sample garment adalah contoh garment referensi yg sudah disetujui pelanggan dan dibuat pihak pabrik
  Approved sample garment is a sample reference garment that has been approved by the customer and made by the factory
- PPS comment adalah informasi yang menyertai approved sample garment sebagai panduan untuk produksi bisa dilaksanakan dengan benar
  PPS comment is information that accompanies approved sample garment as the guide for production can be implemented correctly
- Shipping schedule adalah tanggal yang ditentukan oleh pihak pelanggan sebagai tanggal terakhir untuk barang yang diproduksi harus dikapalkan. PIhak pabrik juga harus memperhitungkan perjalanan barang, dan waktu terakhir barang bisa diterima

Shipping schedule is the date specified by the customer as the last date for the goods produced to be shipped. Manufacturers must also take into account the travel of goods, and the last time the goods are acceptable

Prosedure Detile

Tanggung Jawab
Responsibility

5.1 Pre-production (Sebelum memulai produksi)

Pre-production (Before starting production)

Adm sewing/chief line

5.1.1 Personil / Petugas / Adm. sewing harus mendapatkan informasi yang terdiri dari:

Personnel / Officer / Adm. sewing must obtain information consisting of

- Order details status (Order status dan schedule produksi); rincian informasi mengenai jumlah order quantity, tanggal export, size break down, warna atau color way, po dan Negara tujuan exportnya).
  Order details status (Order status and production schedule); detailed information on quantity of order quantity, export date, size break down, color or color way, po and export destination country).
- Trims card / Acc card, details accessories, dan material status dari bagian merchandise atau material team.
  Trims card / Acc card, details accessories, and material status from the merchandise or material team.
- Approved sample garment.
  Approved sample garment.
- PPS comment
  PPS comment
- Shipping schedule – Schedule pengiriman barang atau eksport.
  Shipping schedule - Schedule delivery of goods or exports.

Merchandiser

5.1.2 PPM (Pre-production meeting) harus dilakukan paling telat 1 hari sebelum mulai produksi jalan atau cutting. PP meeting harus diikuti oleh QC in line (Production QA), QC supervisor, Merchandiser, Kepala line sewing, sample room, mechanic, dan sewing manager, personil pattern, marker dan cutting. Untuk repeat order (pengulangan-pernah jalan), bagian sewing harus merujuk ke hasil PP meeting sebelumnya dan melalukan internal **PP meeting** di wilayah kerja bagian sewing dan hasil PP Meeting dicatat ke dalam “Form Internal PP Meeting”

	PPM (Pre-production meeting) must be done at least 1 day before starting road production or cutting. PP meeting should be followed by QC in line (Production QA), QC supervisor, Merchandiser, Head of sewing line, sample room, mechanic, and sewing manager,personnel pattern, marker and cutting. For repeat orders, the sewing section should refer to the results of previous meeting meetings and internal PP meetings in the working area of the sewing section and the results of the PP Meeting are recorded in the"Internal PP Meeting Form"	Tanggung jawab *Responsibility*
5.1.3	Untuk mengawasi out put dan in put material di sewing line, petugas sewing atau petugas ADM sewing harus menyiapkan laporan masalah produksi harian dan dilaporkan kepada Manager produksi atau bagian lain yang berhubungan. *To monitor out put and material input in the sewing line, the sewing officer or the ADM sewing officer must prepare a daily production issue report and report it to Production Manager or other related parts.*	Adm sewing
5.1.4	Kepala sewing line, sewing supervisor dan in line QC harus mempelajari sample garment dan supervisor harus mengatur operator dan membuat persiapan proses sewing. *Head sewing line, sewing supervisor and in line QC must study sample garment and supervisor must arrange the operator and make preparation of sewing process.*	Chiefline
5.1.5	Petugas Sewing harus memberikan instruksi untuk persiapan potongan kain (panel-panel), aksesoris, dan meminta patrun produksi ke bagian marker atau pattern.Pattern tersebut harus dicap dan ditandatangani oleh petugas berwenang, karena tanpa tanda tangan dianggap tidak berlaku. *Sewing officers must provide instructions for the preparation of pieces of fabric (accessories) , and requesting production patrun to the marker or pattern.Pattern parts must be stamped and signed by the authorized officers, since no signature is deemed invalid.*	Supervisor sewing
5.1.6	Petugas sewing harus mencatat informasi mengenai penerimaan potongan kain dan aksesoris dan permasalahanya di **Catatan “Penerimaan Potongan Kain” dan “Penerimaa aksesories log book”.** *The drainage officer shall record information on the acceptance of pieces of cloth and accessories and the issues in the Notes "Cloth Coverage" and*	

"Recipient accessory log book".	Supervisor sewing
5.1.7 Paling telat 2 hari sebelum memulai proses sewing, kepala sewing dan supervisor harus mengajukan permohonan mesin-mesin ke bagian mekanik bersamaan dengan original sample dan selanjutnya mekanik harus menyipakan semua mesin-mesin yang diminta. Ke dalam **"Form Permohonan Permintaan mesin".** *At least 2 days prior to starting the sewing process, the sewing head and the supervisor must apply for the machines to the mechanical parts together with* *the original sample and then the mechanics must prepare all requested machines. Go to "Machine Request Request Form".*	Tanggung jawab *Responsibility* Supervisor/chief line
5.1.8 Setelah menerima pemasukan material (potongan-potongan bahan dan aksesoris), supervisor sewing harus mengecek kesiapan mesin dan patrun produksi kemudian memberikan intruksi kepada sewing helper untuk memulai process penomoran, dan penggambaran atau penandaan patrun. *Upon receipt of material entry (pieces of material and accessories), the supervisor must check the readiness of the machine and the production patrun then provide instructions to the sewing helper to start the numbering process, and the description or marking of the patrun.*	
5.1.9 Untuk semua trims atau aksesoris yang bersifat elastis, supervisor sewing atau manager sewing harus memastikan bahwa aksesoris tersebut sudah di steam atau di uap agar tidak terjadi penyusutan ukuran setelah jadi garment, yang berakibat size spec masalah dan atau bentuk garment jadi gelembung atau berkerut. *For all trims or accessories that are elastic, the sewing supervisor or the sewing manager must ensure that the accessories are steam or steam in* *order to avoid shrinkage of size after garment,resulting in a spec-size problem and or garment form being bubbled or wrinkled.*	Supervisor/inlineQC/ assembly QC

	QC Supervisor
5.2 Proses jahit – sewing *Sewing process - sewing*	
	Tanggung jawab *Responsibility*
5.2.1 Supervisor atau kepala sewing harus mengintruksikan dan mengajarkan cara jahit yang benar dengan standard quality yang dikehendaki kepada operator sewing pada saat proses penyusunan mesin jahit atau proses overline. *Supervisor or head sewing should instruct and teach the correct way of sewing to the desired quality standard to the sewing operator during the process of sewing or overline processing.*	Manajemen line (chiefline, supervisor line, inline QC, assembly &endline QC, mekanik)
5.2.2 Manager sewing harus memeriksa semua proses sewing secara periodik agar standar kualitas yang dikehendaki bisa konsisten dan stabil. Bisa juga dilakukan berdasarkan informasi dari QC inline proses ataupun berdasarkan data dari QC assembly. **Atau QC inline dan supervisor sewing sama – sama membuat standar kualitas (mock up) untuk proses – proses tertentu (Kritikal proses)** *The sewing manager should check all the sewing processes periodically so that the desired quality standards can be consistent and stable. Can also be done based on information from QC inline process or based on data from QC assembly.* ***Or inline QC and sewing supervisor both create quality standards (mock up) for certain processes (Critical process)***	Inline QC
5.2.3 Jika terjadi pergantian operator sewing dikarenakan operator sewing berhalangan dan absent, supervisor sewing harus memastikan bahwa operator pengganti bisa mengerjakan proses tersebut dengan baik dan harus selalu memonitor agar kualitas bisa terjaga. *In the event of a change of operator due to the absent and absent sewing operators, the supervisor must ensure that the replacement operator can do the process well and should always monitor for quality to be maintained.*	Supervisor/inlineQC/ assembly QC/endline QC
5.2.4 Supervisor atau kepala sewing harus mengawasi pemasangan label, baik ukuran dan Negara tujuan untuk setiap po. Prosedur ini dimaksudkan untuk menghindari salah pasang size label, atau salah masuk produksi (po) sehingga bisa berakibat keterlambatan di proses finishing dan delivery ekspor.	Tanggung jawab *Responsibility* Endline QC

Supervisors or sewing heads should supervise the installation of labels, both sizes and destination countries for each po. This procedure is intended to avoid misplaced label size, or incorrect production (po) so that it can result in delays in the export finishing and delivery process.

5.2.5 Out put pertama (hasil pertama) dari tiap tiap line harus di periksa oleh supervisor QC sewing berdasarkan prosedur "**Pemeriksaan Dalam Process (inspection in process)"**. Jika ditemukan masalah baik dalam bentuk details kontruksi, color way, aksesoris dan ukuran, harus segera dilaporkan kepada kepala sewing atau manager sewing untuk diperhatikan dan diperbaiki.

The first output of each line must be checked by the QC supervisor under the "In-process Inspection" procedure. If a problem is found in either construction details, color way, accessories and size, it should be immediately reported to the sewing head or sewing manager to be noticed and corrected.

5.2.6 Assisten sewing QC harus memeriksa dan membuat rekapan atau catatan mengenai produksi hasil pertama (first out put) dengan menggunakan "**Form First Out Put Comment atau pilot run comment"** dan memberikan salinannya kepada kepala sewing atau manager.

Assistant sewing QC should check and make a recap or record of the first out put by using "Form First Out Put Comment or pilot run comment" and give a copy to the sewing head or manager.

5.2.7 Supervisor QC sewing dan QC in line harus mengontrol dan memeriksa kualitas dari hasil proses jahit. Informasinya bisa diambil berdasarkan hasil informasi data dari sewing assembly untuk dasar dan pencarian akar permasalahan dan tindakan perbaikan, sehingga ketidaksesuaian bisa diatasi atau dihilangkan . Target utamanya adalah setiap proses harus sekali langsung benar

The QC sewing and QC in line supervisors should control and check the quality of the sewing process. The information can be retrieved based on the results of the data information from the sewing assembly for basic and root-seeking problems and corrective actions, so that non-conformities can be overcome or eliminated. The main target is that each process must be right first time (RFT).

5.2.8 Final QC (endline QC) harus mengecek kualitas semua hasil produksi / barang jadi dari sewing. Hasil pemerikasaan harus di catat dalam

	laporan endline inspection dan Garment Measurement Record (Daily inspection report). *Final QC (QC endline) should check the quality of all finished products / finished goods from sewing. The results of the examination should be noted in the endline inspection report and the Garment Measurement Record (Daily inspection report).*	Tanggung jawab *Responsibility*
5.2.9	Jika ditemukan masalah mengenai kualitas baik workmanship, kontruksi, ukuran, atau salah pemasangan akesoris label dan trims lainnya, QC depan atau assembly QC harus segera melaporkan hal tersebut kepada inline QC, supervisor QC dan manager sewing untuk mengadakan perbaikan. Bisa lihat kembali point 5.2.7 *If a problem is found concerning the quality of either workmanship, construction, size, or incorrect installation of label accessories and other trims, the forward QC or QC assembly should promptly report it to the QC inline, QC supervisor and sewing manager to make improvements. Can refer back to point 5.2.7*	
5.2.10	Semua noda minyak, kotoran, tanah, harus di buang dan dibersihkan di bagian sewing (petugas sewing) sebelum dikirim ke bagian finishing. Dan mekanik harus memeriksa mesin terkait *All oil stains, dirt, soil, must be thrown away and cleaned in the sewing (sewing officer) before being sent to the finishing section. And the mechanic should check the related machine*	
5.2.11	Assistant supervisor QC sewing harus membuat ***Laporan Ringkasan Sewing final inspection (endline report)*** dan laporan ini harus disampaikan kepada sewing supervisor atau manager untuk mengadakan perbaikan mutu di daerah kerja sewing line. *Assistant supervisor QC sewing must prepare a final Sewing Summary inspection report (endline report) and this report should be submitted to the sewing supervisor or manager for quality improvement in the working area of the sewing line*	
5.2.12	Garment dengan status ok setelah pengecekan akhir (QC depan), harus segera di kirim ke bagian finishing untuk proses finishing dan pengepakan dan harus melalui needle detector	

Garment with ok status after final check (front QC), must be sent to the finishing for finishing and packing process and must go through needle detector

Tanggung Jawab
Responsibility

5.3 Pengaturan garment yang reject.
Setting the reject garment.

5.3.1 Semua garment yang reject harus di kembalikan ke sewing line untuk diperbaiki dan QC akhir (endline QC) harus memeriksa ulang garment tersebut sebelum dikirim ke bagian finishing.
All rejecting garments must be returned to the sewing line for repair and the final QC (QC endline) should check the garment before it is sent to the finishing section.

5.3.2 Jika garment reject karena proses finishing, garment reject tesebut harus dikembalikan ke QC akhir (QC depan) untuk selanjutnya di berikan kepada line yang bersangkutan untuk diperbaiki.
If the garment reject is due to the finishing process, the garment reject must be returned to the final QC (endline QC) for subsequent to be given to the respective line for repair.

5.3.3 Untuk garment yang rusak atau reject dan memerlukan penggantian potongan kain atau aksesoris, supervisor sewing harus memerintahkan petugas sewing (ADM) untuk mengajukan permintaan pengganti bahan atau aksesoris. *For damaged or reject garments and require the replacement of pieces of fabric or accessories, the supervisor must instruct the sewing officer (ADM) to file a replacement request for materials or accessories.*
