Supervisor gudang harus mengecek status **purchase request (PR)** kemudian berkoordinasi dengan bagian purchasing atau logistic dan exim jika ada material yang belum datang dari jadwal penerimaan yang telah ditentukan. *The warehouse supervisor must check the status of the purchase request (PR) then coordinate with the purchasing or logistics and exim departments if there are materials that have not arrived from the predetermined receiving schedule*	Warehouse spv
1.1.7. Kain yang baru diterima sebelum inpeksi harus diperiksa kelembaban nya 10% dari kain tersebut menggunakan alat Landtek dengan standard yang sudah ditentukan di area Gudang kain, Gudang accessories,	

Dilarang Mengcopy / Menyebarluaskan Tanpa Izin Dept ISO

Cutting, Sewing dan Finishing. Apabila kain sudah memenuhi syarat maka kain akan langsung di proses, namun apabila kain tidak memenuhi syarat maka kain tersebut akan dipisahkan dari kain yang lain dan akan disimpan di ruang conditioning room untuk diperiksa kembali kelembabannya secara berkala dan akan disimpan di ruang conditioning room. *Newly received fabrics before inspection must be inspected The humidity is 10% of the fabric using Landtek tools with predetermined standards in the Fabric Warehouse, Accessories Warehouse, Cutting, Sewing and Finishing areas. If the fabric meets the requirements then the fabric will be processed immediately, but if the fabric does not meet the requirements then the fabric will be separated from other fabrics and will be stored in the conditioning room to be checked for humidity regularly and will be stored in the conditioning room.*	
1.1.8. Selambat-lambatnya 3 hari setalah tanggal penerimaan, petugas penerimaan kain harus membuat "Shade Lot" dan memberikannya kepada bagian merchandise untuk shade lot approval, bagian pemotongan (cutting) dan simpan satu (1) untuk bagian gudang kain *No later than 3 days after the date of receipt, the fabric receiving officer must make a "Shade Lot" and give it to the merchandise department for shade lot approval, the cutting section and save one (1) for the fabric warehouse section*	whs team
1.2. Penyimpanan Kain *Fabric storage*	
4.2.1 Kain untuk Produksi *Fabric for production*	
1.2.1.1. Petugas gudang kain harus menyimpan kain yang diterima di rak-rak yang kosong dan kemudian mencatat kode lokasi di penempatan dan pemindahan lokasi dengan menggunakan "form Penempatan dan Pemindahan" *The fabric warehouse operator must store the received fabric on empty shelves and then record the location code at the placement and transfer location using the "Placement and Transferring Form"*	whs team
1.2.1.2. Petugas gudang kain harus membuat catatan lokasi dan transaksi kain dan memberikannya kepada staff gudang kain untuk kemudian memperbaharui data ke dalam "***Catatan Lokasi dan Transaksi log book".*** *The fabric warehouse operator must make a record of the location and fabric transactions and give it to the fabric warehouse staff to then update the data into the* ***"Location Records and Transaction log book".***	
1.2.1.3. Jika ada perubahan lokasi kain, petugas gudang kain harus melalukan kembali langkah **4.2.1.1** dan **4.2.1.2.** *If there is a change in the location of the fabric, the fabric warehouse officer must repeat steps 4.2.1.1 and 4.2.1.2*	WHS team

1.2.2. Kain untuk sample *Fabric for sample* 1.2.2.1. Kain untuk sample harus disimpan di tempat penyimpanan kain sample dan tidak boleh dicampur dengan kain untuk bulk produksi. Biasanya kain untuk sample disimpan di sample room/CAD Room. *Fabrics for samples must be stored in a sample fabric storage area and should not be mixed with fabrics for bulk production. Usually the fabric for the sample is stored in the sample room/CAD Room.* 1.2.2.2. Berdasarkan informasi dari bagian merchandise atau Marketing, kain untuk sample harus di identifikasi dengan TAG kain untuk sample dengan menggunakan “Fabric Salesman Sample Tag”. *Based on information from the merchandise or marketing department, the fabric for the sample must be identified with the fabric TAG for the sample using the "Fabric Salesman Sample Tag*". 1.2.2.3. Petugas kain untuk sample harus mencatat item kain dan kode lokasi serta memperbaharui data kedalam catatan ***“Sample Storage Log Book”.*** *The fabric operator for the sample must record the fabric item and location code and update the data into the “Sample Storage Log Book” record* 1.2.3. Padding material *Padding material* 1.2.3.1. Material padding harus di simpan di tempat yang telah ditentukan, atau berdasarkan permintaan untuk quilting, di simpan di tempat penyimpanan quilting. Kemudian Informasi material harus di catat ke dalam **“Transaksi dan Lokasi Log Book”** *Padding material must be stored in a designated location, or upon request for quilting, stored in a quilting repository. Then material information must be recorded in the "Transaction and Location Log Book"* 1.2.4. Kain sisa dari bulk production. *Leftover fabric from bulk production* 1.2.4.1. Berdasarkan laporan status produksi (selesai export), petugas gudang kain harus mengumpulkan dan menyimpan kain sisa produksi ke rak-rak yang telah ditentukan dan membuat laporan left over report. Informasi mengenai kain sisa produksi harus di catat ke dalam “**Laporan Catatan Lokasi dan Transaksi Log Book”** *Based on the production status report (completed export), the fabric warehouse officer must collect and store the remaining fabric production*	Whs team

Dilarang Mengcopy / Menyebarluaskan Tanpa Izin Dept ISO

to the designated shelves and make a left over report. Information regarding leftover fabrics must be recorded in the "Location Record Report and Transaction Log Book"

1.2.4.2. Staff gudang kain harus memeriksa status kain sisa produksi dalam 3 bulan sekali. Untuk kain yang sudah di pakai dan selesai order, sisa kain dari produksi harus di simpan di gudang stock untuk dipakai di purchase order lain. Semua catatan baik penerimaan, pemakaian, maupun sisa yg dipakai untuk order lain sudah tinggal masukkan data dalam program IFMS

The fabric warehouse staff must check the status of the leftover fabric every 3 months. For fabrics that have been used and have finished ordering, the remaining fabric from production must be stored in the stock warehouse to be used in other purchase orders. All records, both receipts, usage, and leftovers used for other orders, and enter the data in the IFMS program

1.2.4.3. Jika ada perubahan stock dari kain sisa produksi karena dipinjam atau di pakai untuk repeat order, maka data stock harus diperbaharui kedalam "**Laporan Stock Kain (balance material list)"** .

If there is a change in the stock of leftover fabric because it is borrowed or used for repeat orders, the stock data must be updated into the "Fabric Stock Report (balance material list)"

1.2.5. Sisa kain

Left over fabric

1.2.5.1. Setelah menerima laporan sisa kain dari produksi, staff gudang kain harus berkoordinasi dengan team material atau purchasing untuk memperbaharui **Laporan Stock/ Balance Material**".

After receiving the report of the remaining fabric from production, the fabric warehouse staff must coordinate with the material or purchasing team to update the Stock/Material Balance Report"

1.3. Pengeluaran kain

Outgoing fabric

1.3.1. Kain untuk bulk production.

Fabric for bulk production

After receiving the "Request and Collection of Fabrics" form from the cutting department, the fabric warehouse staff must check the status of the fabric in the transaction and location report and provide the fabric request form to the warehouse cutting transporter.

1.3.1.2. Personil pengambil kain (Cutting warehouse transporter) harus mencatat rincian kain dalam form pengambilan kain, dan

Dilarang Mengcopy / Menyebarluaskan Tanpa Izin Dept ISO

selanjutnya staff gudang kain harus meng up date (memperbaharui) "**Laporan Stock/ Balance Material List".** *The cutting warehouse transporter must record the details of the fabric in the fabric collection form, and then the fabric warehouse staff must update the "Stock Report/Balance Material List".* 1.3.2. Kain untuk sample *Fabric for sample* **1.3.2.1.** Setelah menerima form "Permintaan dan Pengambilan Kain, petugas kain sample harus menyiapkan dan mengambil kain untuk diberikan kepada sample room atau ruang pemotongan dengan menggunakan "**Fabric Sample Card"** *After receiving the "Request and Retrieval of Fabrics" form, the fabric sample officer must prepare and collect fabrics to be given to the sample room or cutting room using the "Fabric Sample Card"* 1.3.2.2. Kemudian petugas kain sample harus meng up date (memperbaharui) kain untuk sample dalam "C**atatan Sample Storage Log Book"** dan bukti pengambilan kain sampke harus di simpan dengan baik. Status sample ditampilkan dalam layarmonitor untuk perhatian semuanya termasuk dikirim by email statusnya kepada pihak yg berkepentingan *Then the sample fabric officer must update (update) the fabric for the sample in the "Sample Storage Log Book Record" and proof of sample cloth collection must be stored properly. The sample status is displayed on the monitor screen for everyone's attention including being sent by email the status to interested parties* 1.3.3. Kain Rusak atau Hilang *Fabric reject or missing* 1.3.3.1. JIka ada material atau kain yang rusak / hilang, supervisor gudang harus melaporkan hal tersebut ke bagian logistic (exim), purchasing, merchandise atau marketing untuk tindakan lebih lanjut. *If any material or fabric is damaged / lost, the warehouse supervisor must report this to the logistics (exim), purchasing, merchandise or marketing department for further action*.	
1.4. Pengecekan kain (Fabric inspection) dan kain reject yang dikembalikan *Fabric inspection and returned reject fabric* 1.4.1. Setelah menerima kain dan dokumentasinya, QC kain harus melakukan pengecekan kain secara acak sebanyak 10% dari keseluruhan jumlah yang diterima untuk setiap item, lot dan warna. Dan bila kwalitasnya di bawah, bisa dilanjutkan untuk persentasi lbh lagi bahkan bisa 100% check tergantung hasil kwalitas kain tersebut. *After receiving the fabric and its documentation, the fabric QC must do a random check of the fabric as much as 10% of the total quantity received for each item, lot and color. And if the quality is below, it can be continued for more percentages and can even be 100% checked depending on the quality of the fabric.* 1.4.2. QC kain harus menyiapkan form "Pengecekan Kain / Fabric Inspection form" dan petugas gudang kain harus mencatat hasil pemeriksaan kain di laporan transaksi dan lokasi kain berdasarkan 4 point system	QC Inspection CNCN PIC

Dilarang Mengcopy / Menyebarluaskan Tanpa Izin Dept ISO

The fabric QC must prepare a "Fabric Inspection form" form and the fabric warehouse officer must record the results of the fabric inspection in the transaction report and fabric location based on a 4 point system 1.4.3. Hasil pengecekan kain (kain yang sudah di periksa), harus di lampirkan pada setiap gulungan kain yang bagus atau lolos pemeriksaan. *The results of checking the fabric (fabric that has been checked), must be attached to every roll of fabric that is good or passes the inspection*	
1.4.4. Kain yang reject harus di identifikasi dengan stiker berwarna merah dan harus di pisahkan di areal kain reject agar tidak bercampur dengan kain yang bagus dan ditempatkan dalam area CNCM (Control non confirming material) dan harus selalu direvisi datanya *Reject fabric must be identified with a red sticker and must be separated in the reject fabric area so that it does not mix with good fabric and placed in the CNCM (Control non confirming material) area and the data must always be revised*	
1.4.5. Semua informasi mengenai kain reject harus segera di informasikan ke supervisor gudang, cutting, marker dan sample, merchandise, logistic, and bagian purchasing agar bisa mengambil langkah atau tindakan selanjutnya. *All information regarding reject fabrics must be immediately informed to the warehouse supervisor, cutting, marker and sample, merchandise, logistics, and purchasing department so that they can take further steps or actions*	Qc & whs team
1.4.6. Dalam masa atau process penggantian dan claim ke supplier, kain yang reject harus disimpan di daerah kain reject (CNCM area) dan harus dalam pengawasan QC kain. *During the replacement period or process and claims to the supplier, the rejected fabric must be stored in the reject fabric area (CNCM area) and must be under the supervision of the fabric QC.*	
1.4.7. Penggunaan kain reject dengan marker khusus harus melalui langkah **4.3.1** dan sisa kain reject harus dikembalikan kepada QC kain untuk keeping dan diperlihatkan kepada supplier kain jika diperlukan. *The use of reject fabrics with special markers must go through step 4.3.1 and the remaining reject fabrics must be returned to the fabric QC for keeping and shown to the fabric supplier if needed*	QC Inspection
1.4.8. Jika ada kekurangan kain karena alasan reject, staff gudang kain harus meng up date / memperbaharui laporan transaksi dan lokasi kain. *If there is a shortage of fabric due to reject reasons, the fabric warehouse staff must update / update the transaction report and fabric location*	Qc cutting & whs team
1.4.9. Catatan mengenai informasi kain reject harus dibicarakan dalam meeting management dan pihak pihak atau bagian yang bersangkutan harus mengambil tindakan yang diperlukan untuk mengatasi masalah. *report regarding reject fabric information must be discussed in a management meeting and the party or department concerned must take the necessary actions to resolve the problem*	
1.4.10. Jika ada kain yang reject dan lolos ke bagian cutting, QC di bagian cutting harus memberitahukan petugas / pernonil pemotongan untuk mengembalikan kain tersebut ke bagian gudang kain dan minta pergantian kain yang bagus.	

Dilarang Mengcopy / Menyebarluaskan Tanpa Izin Dept ISO

If any fabric is rejected and passes to the cutting section, the QC at the cutting section must notify the cutting officer / personnel to return the fabric to the fabric warehouse and ask for a good fabric replacement
