MESIN POTONG OTOMATIS KALIBRASI HARIAN

AUTO CUTTING MACHINE DAILY CALIBRATION

No.	: YJ-IK.CUT.0018
Tgl. Efektif	: 02 November 2022
No. Revisi	: 00
Halaman	: 1 dari 1

• Cutting Layout for daily calibration include straight lines & curve shape

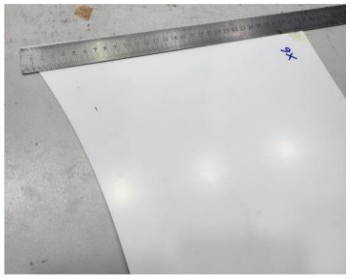

• Tata Letak Pemotongan untuk kalibrasi harian meliputi bentuk garis lurus & kurva.

• Sebelum memulai pemotongan setiap pagi dan sore (setiap kali menyalakan mesin), operator memotong 1 lembar kertas sesuai tata letak, kemudian mengkalibrasi keakuratan pemotongan dengan template plastik (Tanda tangan dengan tanggal & waktu)

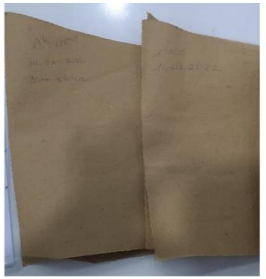

• Make a plastic template as per cutting layout for daily calibration.
• The plastic template is calibrated by metal calibrated ruler.
• The plastic template is chopped & signed with date.

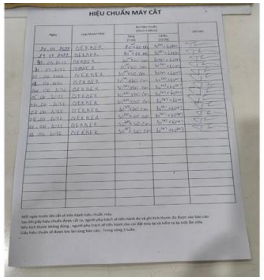

• Buat template plastik sesuai tata letak pemotongan untuk kalibrasi harian.
• Template plastik dikalibrasi dengan penggaris logam yang dikalibrasi.
• Template plastik dipotong & ditandatangani dengan tanggal

• Before start cutting every morning and afternoon (each time when turn on machine), operator cut 1 pcs paper as per layout, then calibrate cutting accuracy by the plastic template (Sign with date & time)

• Simpan catatan kalibrasi harian untuk melacak.

• Keep daily calibration record for tracking
