Storage Time and Arrangement of Keep Sample S.O.P

YJ.IK-CAD.0057

revised: 2-Apr-2024

1. Sample yang sudah selesai sewing akan di check terlebih dahulu oleh operator sewing, chief sample room, QC finishing, dan manajer Korea sample room.

   The sewn sample will be checked first by the sewing operator, sample room chief, QC finishing, and sample room Korean manager.

2. Setelah pemeriksaan akhir, MD mengambil sampel yang sudah jadi setelah menandatangani laporan QC finishing.

   After the final inspection, the MD signs the QC finishing report and takes the completed sample.

3. MD akan memasangkan hangtag pada sample yang sudah diambil. Terdapat 2 hangtag yang berbeda :

- Hangtag sample untuk buyer
- Hangtag sample untuk keeping Yongjin

MD will attached the hangtag to the taken sample.

There is 2 different hangtags :

- *Hangtag for buyer sample*
- *Hangtag for Yongjin keeping*

4. Keep sample yang sudah terpasang hangtag akan digantung dan/atau dipisahkan berdasarkan season, dan disimpan paling lama 2 tahun.

   Apabila terdapat riwayat issue yang serius pada sample, sample dapat disimpan lebih lama.

   The keep sample that have hangtag attached will be hung and/or separated based on the season, and stored for latest 2 years.

   If the sample has outstanding issue history, sample will be stored longer.
